Key Vocabulary

Vertebrate	Animals **with backbones**
Mammal	An animal that breaths with lungs, babies are born live, body hair, feeds babies milk, body temperatures is the same
Amphibian	An animal that is born with gills then develops lungs, lays eggs in water, damp skin, body temperature
Birds	Breathes with lungs, lays eggs, has feathers, body temperatures is the same
Reptiles	An anima that breaths with lungs, leys eggs on land, has dry scaly skin and body temperature changes
Invertebrate	Animals with **no backbones,** e.g. an insect, mollusc, or arachnid.
Habitat	Where a plant or animal lives.

Classification keys

These are used to group animals and plants in different ways. Classifying is grouping things that are similar.

Humans can negatively change habitats, for example by dropping litter or chopping down trees.
